Host

Prof. Didier Lardinois, Department of Thoracic
Surgery, University Hospital Basel

Venue

Institute of Anatomy, University Basel,
Pestalozzistrasse 20, 4056 Basel

Organization

Dr. Wolfgang Moersig, Department of Thoracic
Surgery, University Hospital Basel

Sponsors

Current Concepts of Chest Wall Stabilization

2nd Basel workshop

November 9th – 10th 2017

Dear colleagues

After the success of the last workshop, it's our great pleasure to invite you to the Second Basel Workshop on Current Concepts of Chest Wall Stabilization.

Starting with focus on rib stabilization, we will extend on the surgical management of sternum fractures.

Our goal is to present the most frequently used systems in this field to give the opportunity to the participants to become familiar with the different techniques. We give you the possibility to discuss interesting cases with outstanding international experts and present your own cases to the faculty.

Finally we will have the unique chance to practically test all systems in the Anatomical Institute of the University of Basel.

Register now, we are looking forward to welcome you in Basel,

Prof. Didier Lardinois
Head of Department of Thoracic
Surgery

Dr. Wolfgang Moersig
Consultant of Department of
Thoracic Surgery

Scientific program

2.00 – 6.00 pm	November 9th Current State of the Art	
2.10 pm	Management of severe blunt Thoracic Trauma	L. Lampl, Klinikum Augsburg
2.45 pm	Modalities of Analgesia in Patients with Rib and/or Sternum Fractures	T. Schneider, University Hospital Basel
3.20 pm	Indications and Results of Rib Stabilization	D. Lardinois, University Hospital Basel
4.00 pm	Coffee break	
4.30 pm	When is it necessary to operate a Sternum Fracture and How To Do It?	S. Schulz-Drost, Unfallkrankenhaus Berlin
5.10 pm	Surgical Management of the Symptomatic Unstable Sternum	G. Massard, Nouvel Hôpital civil Strasbourg
5.50 pm	Closing Remarks day 1	
6.00 pm	Get Together	
8.45 am – 3.00 pm	November 10th Introduction to the different Fixation Systems (Eliamm®, StraTos® and Synthes®)	
8.55 am	Analysis of the Techniques according to the Properties of the Fractures and of the Bone (Edwards, Wiese, Massard) incl. discussion	J. Edwards, North. Gen. Hospital Sheffield, G. Massard, Nouvel Hôpital civil Strasbourg
10.30 am	Illustration with cases (faculty and bring Your own cases electronically two weeks in advance)	S. Raab, Universitätsklinik Augsburg, V. Anikin, Royal Brompton & Harefield NHS Foundation Trust, Harefield
11.30 am	Lunch Break	
12.30 am – 3.00 pm	Practical Part Practical Handling of the different Systems for each Participant in Anatomical Institute Closing remarks day 2, evaluation and departure
